

# A animals, A animals, A animals

Animals come in all shapes and sizes. Some live on the land, others live in the sea. They come in different colors and some even have stripes, while others have spots! Practice your signs while finding similarities in all of these wacky animals!

## Directions:

1. Assist your child in cutting out each animal.
2. Sort each animal by size (small, medium, large)
3. Now, sort by color (this will give you practice for your color signs!) If the animal is patterned, sort by stripes or spots.
4. Now, if you are really advanced, sort if the animal lives in the land or in the water.
5. For a real challenge, research each animal and sort by weight, height and country or region of origin.
